

On the Move

PAM BELL has joined Ross & Baruzzini as a Senior Technology Consultant. She will be working with the Los Angeles World Airports IT Program Management Office based in Los Angeles, California. Ms. Bell joins the firm with 30+ years of experience in engineering and information technology in aviation. In her most recent role, Ms. Bell served as a Principal/Technology Consultant for Arup Americas. She has also served as the IT Systems Director for the Anchorage International Airport. Her areas of expertise include IT Master Planning, airport technology planning, airport systems integration, common use facilities, air traffic control facilities and program management. Ms. Bell's experience in project management, strategic planning and skills in research and experiment design add unique capabilities to the firm.

ROBERT DELANY has joined Ross & Baruzzini as Senior Information Technology Program Manager. He will be working with the Los Angeles World Airports IT Program Management Office based in Los Angeles, California. Mr. Delany joins the firm with over 25 years of experience in project management and information technology. He is committed to business transformation through process consistency, achievable pragmatic parameters and continuous service quality improvement. Mr. Delany has a thorough understanding of initiation, development, implementation and operating strategies for Project Management Office processes and governance.

MS. LAURA KLARFELD is the new International Regional Sales Manager, North & South America for Zoetig Inc. Zoetig Inc is headquartered in Chicago and Zoetig Ltd, the parent company, is headquartered in Bude, Cornwall in the UK. Laura will be based in the Los Angeles area office overseeing all business development, strategic management and corporate relations for the transportation markets in North and South America. She has worked in both FF&E and Passenger Processing for over 16 years providing solutions for the transportation market, including airports and airlines in North America.

STEPHEN D. VAN BEEK, PH.D. joined LeighFisher as Chief of Policy and Strategy. In this newly created position, Dr. Van Beek will have the responsibility for coordinating policy, strategy, and regulatory advice to clients across all modes and will help President Nick Davidson and the Executive Management Team launch LeighFisher's new surface transportation practice. Dr. Van Beek has worked in a variety of private, non-profit, and governmental positions in transportation, including most recently leading the Eno Transportation Foundation — a private foundation focusing on transportation policy, professional development, and research. Dr. Van Beek will work out of LeighFisher's Washington, DC area office located in Reston, Virginia.

And the Winner Is...

GRESHAM, SMITH AND PARTNERS completed a Land Use and Development Options Plan (LUDOP) for Dayton International Airport (DAY). Assessing approximately 650-acres of airport property, the plan identifies opportunities and restrictions associated with both Aeronautical and non-Aeronautical related development, dividing the property into three distinct areas. Within the context of the plan, GS&P conducted a regional market assessment, a target industry analysis and a supply chain analysis. GS&P also conducted an update to the DAY Environmental Inventory to identify potential environmental concerns. The purpose of the inventory was to assist in preparation of an environmental impact statement by identifying the National Environmental Policy Act (NEPA) impacts that may need to be addressed. GS&P conducted field analysis, historical records reviews, airport staff and regulatory interviews to determine the potential for airport development to cause environmental impacts that would require NEPA work in several areas including but not limited to the following categories: air quality, energy supplies, natural resources and sustainable design, social impacts and water quality. In addition to work with DAY, GS&P's Land Planning division was recently awarded Outstanding Plan — Large Jurisdiction by the Kentucky Chapter of the American Planning Association (KAPA). KAPA recognized Louisville Metro Government and their consultant team, led by GS&P, for their work on the River Road Scenic Byway Corridor Management Plan (CMP) which lays out a broad range of strategies and actions to protect and enhance the state designated Scenic Byway corridor.
